Call for volunteers Can Ruti Biomedical Research Seminar Series

Julian Blanco Arbues (jblanco@irsicaixa.es); Sonia Forcales Fernandez <sforcales@igtp.cat>; mbuschbeck@carrerasresearch.org

Dear Researchers,

As you probably know, the Biomedical Research Seminars started last month at the Campus Can Ruti as a new research initiative. Seminars cover the breadth of research at the Campus and are designed to inspire interdisciplinary and transversal research through keynote lectures of top international researchers. Seminars are held on a monthly basis at the IJC auditorium, widely announced and open to everyone. The seminars increase the visibility of the campus and are an excellent opportunity for the different researchers to contact with top research teams.

In its first edition, The Can Ruti Biomedical Research Seminar Series has been organized by Marcus Buschbeck (IJC), Sonia Forcales (IGTP) and Julià Blanco (IGTP/IrsiCaixa). Now it is time to start planning the second edition of the Seminar Series (Sept-2019- June 2020) and we believe that a new organizing committee will bring new ideas to the seminars and will make them even more open to the different research areas of the campus. In this edition we will give priority to achieving gender equality and ensuring diversity among scientific organizers, hosts and speakers

Therefore, this is a formal invitation to all Researchers at the Campus to join the organizing committee. If you are interested in participating, please contact us per email (JBlanco@irsicaixa.es, sforcales@igtp.cat, mbuschbeck@carrerasresearch.org).

The main tasks of the organizing committee are

- Collecting proposals for seminars and hosts and their selection to set up the final program.
- Secure funding for the seminar series (currently, IGTP and external funds are supporting the seminars)
- Disseminating the seminars, coach hosts
- etc

In all these tasks, the committee is assisted by the Communication Team of the IGTP, which will be also in charge of the invitations, trips and accommodations of the speakers.

Do not hesitate to contact us if you have any question, and please consider this invitation as an opportunity to get involved in the continuance of top research activities at the Can Ruti Campus.

Best regards,

The BIOMEDICAL RESEARCH SEMINARS Organizing Committee 2018

Marcus Buschbeck

Sonia Forcales
