**Programme 2018**

**Monday 8 October 15.00**

Targeting LRH1/NR5A2 as a novel immuno-trans regeneration therapy for Type 1 diabetes mellitus

**Benoit Gauthier**  
Department Cell Regeneration & Advanced Therapies, Centro Andaluz de Biología Molecular & Medicina Regenerativa (CABIMER)  
Host: Marta Vives-Pi (IGTP)

---

**Monday 5 November 15.00**

Targeting epigenetic factors for tailored intervention against malaria parasites

**Artur Scherf**  
CNRS Research Director (DRCE), Professor at the Institut Pasteur, Paris, France  
Host: Hernando A. del Portillo (IGTP, ISGlobal)

---

**Monday 12 November 15.00**

JAK2 signaling networks mediate persistence of MPN

**Florian Heidel**  
Professor for Stem Cell Aging, Faculty of Medicine, Friedrich-Schiller University Jena, Germany  
Host: Marcus Buschbeck (IJC)

---

**Monday 19 November 15.00**

From phenotype to WGS: Diagnostics in hematology

**Torsten Haferlach**  
MLL, Germany  
Host: Francesc Solé (IJC)

---

**Monday 3 December 15.00**

Linking individual host variation in disease resistance and tolerance to heterogeneity in pathogen spread

**Pedro Vale**  
Institute of Evolutionary Biology and Centre for Immunity, Infection and Evolution, University of Edinburgh, UK  
Host: Pere Joan Cardona (IGTP)
Programme 2019

Monday 28 January 15.00
How to improve treatments for high risk MDS

Pierre Fenaux
Head of the Senior Hematology Department, Hospital Saint Louis, France
Host: Joan Vives Corrons (IJC)

Monday 25 February 15.00
On the unique regulation and dynamics of IgG4 response (PROVISIONAL)

S. Marieke van Ham
Professor of Biological Immunology at the University of Amsterdam’s Faculty of Science (FNWI), The Nederlands
Host: Eva Martinez-Cáceres (IGTP)

Monday 4 March 15.00
Molecular Strategies for targeted lung cancer therapy (PROVISIONAL)

Martin Sos
Center for Integrated Oncology in Cologne
Host: Rafael Rosell (IGTP)

Monday 25 March 15.00
Engineering the Immune System for Enhanced Cancer Immunotherapy

Luis Alvarez-Vallina
Aarhus University, Aarhus, Denmark
Host: Julia Garcia Prado (IrsiCaixa)

Monday 29 April 15.00
Myotonic dystrophy: complex repeats in a complex disorder

Darren Monckton
Professor of Human Generics, Institute of Molecular Cell and Systems Biology, Glasgow, UK
Host: Gisela Nogales (IGTP)

Monday 13 May 15.00
Searching for exploitable genetic interactions in AML and PDAC (PROVISIONAL)

Johannes Zuber
Research Institute of Molecular Pathology (IMP), Austria
Host: Sònia Forcales (IGTP)

Venue:
Auditorium, IJC Building, Campus Can Ruti
Three research institutes on the Can Ruti Campus, located around the Germans Trias i Pujol University Hospital, are organizing the prestigious Campus Can Ruti Biomedical Series. The Germans Trias i Pujol Research Institute (IGTP), the IrsiCaixa AIDS Research Institute and the Josep Carreras Leukaemia Research Institute (IJC) are all recognized by the Catalan research institution CERCA and under the Instituto Carlos III umbrella accreditation of the IGTP as a health centre of excellence.

The seminars feature leading international scientists and are an important part of the continuing education on the campus. The objective is to give professionals and students the opportunity to hear keynote talks from leading international researchers in different fields and to promote collaboration and multidisciplinary research.

They are free to attend and open to all publics.

The Organizers for 2018-2019 are: Julià Blanco (IrsiCaixa), Marcus Buschbeck (IJC), Sònia Forcales (IGTP).

This series is possible thanks to the generous support of:
